Art Unit: 3751

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 21 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hassinger ('742) in view of Briggs.

In particular, Hassinger clearly designs his relief valve to open when the engine is not operating and especially when thermal expansion causes excess pressure in the rail (see column 6, lines 25-40).

Briggs teaches a similar relief valve which is designed to normally remain closed when the engine is running (column 3, lines 46-49) by setting the opening pressure 10 to 15 psi above the range of normal operating conditions.

It would have been obvious to set the relief pressure of Hassinger higher than normal operating conditions as taught by Briggs since even applicant's system would need to open if truly excessive running conditions existed producing pressures similar to thermal expansion pressures.

Claims 1-20 and 23-24 are allowed.

Applicant's arguments filed January 31, 2005 have been fully considered but they are not persuasive. In particular, Briggs has now been applied to explicitly teach the need to set relief pressures well above normal operating ranges.

Art Unit: 3747

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
